

Candidates Survey

1. When it comes to rising health care costs, would you say research to improve health and prevent disease is part of the problem or part of the solution?

Part of the problem

Part of the solution

Comments

2. Recent studies have shown that federal investments in health and medical research creates jobs in communities across the country that benefit a wide variety of industries. Do you support or oppose boosting investment in medical research and innovation as a job creation strategy?

Support

Oppose

Comments

3. The National Institutes of Health (NIH) spends approximately \$31 billion per year on health research, nearly 85% of which goes to universities, academic medical centers, hospitals, independent research institutes, and small businesses across the country. The NIH budget is decreasing relative to inflation. Do you support or oppose making health research sponsored by NIH a higher national priority, or not?

Support

Oppose

6. According to a March 2011 poll commissioned by Research!America, 90% of Americans agree that the U.S. is in danger of losing its global competitive edge in science, technology, and innovation. Earlier this year, it was reported that China is catching up to the U.S. in R&D investment, surpassing Japan as second to the U.S.

If you are elected, will maintaining America's global competitive edge in science, technology, and innovation be a priority for you, or not?

A high priority

A priority

A low priority

Not a priority

8. Since 1981, the federal government has offered a tax credit to businesses pursuing research and development activities. However, because the tax credit is temporary and must be reauthorized periodically, businesses are never certain about receiving the benefits of the credit for longer-term investments. Do you support or oppose making the R&D tax credit permanent, even if that means a permanent reduction in tax revenues?

Support

Oppose
