

## Your Candidates–Your Health 2010

In polls by Research!America and other organizations, Americans consistently describe medical, health and scientific research as important, yet just 8% say they are very well informed about their elected officials' positions on these issues. To change this, Research!America and our partners are pleased to present *Your Candidates–Your Health*, a voter education initiative.

All candidates for Congress on the ballot in November 2010 will be invited to let voters know where they stand on health and research by filling out a brief questionnaire. Candidates are being invited to participate after each state's primary takes place.
