Networking Coffee
10 a.m. - 11.30 a.m.
Panel Discussion

PANELISTS:
Joseph Allen, Founder, Joseph Allen and Associates
Marc Boutin, Chief Executive Officer, National Health Council (NHC)
Jessica Sebek, Deputy Vice President for Federal Relations and Counsel for Policy, Association of American Universities (AAU)
Steve Susalka, Chief Executive Officer, AUTM
Stephen Heinig, Director, Science Policy, Association of American Medical Colleges (AAMC)

MODERATOR:
Ellie Dehoney, Vice President, Policy and Advocacy, Research!America

By addressing gaps in the intellectual property framework surrounding federally funded research and helping to foster a robust ecosystem for public-private partnerships, the 1980 Bayh-Dole Act has played a pivotal role in fueling scientific and technological progress, conveying the benefits of federally funded research to the public, and - in an ever-changing fiscal and economic climate - assuring sustained public and policymaker support for federal research funding.

As the law’s 40th anniversary approaches, this interactive panel discussion will touch on the history and impact of the Bayh-Dole Act and explore the implications for science policy going forward.
