Total Direct and Indirect Economic Output of the Biopharmaceutical Sector
$7.2 billion

Total Employment Supported by the Biopharmaceutical Sector
27,997

A majority of Americans agree that even if it brings no immediate benefits, basic scientific research that advances the frontiers of knowledge is necessary and should be supported by the federal government.

Local Perspective: Fort Mill, SC
"I support research because I love someone who suffers from a devastating disease with no approved treatment. It’s the only way we’ll build a better future for people like my sister."

Laura King Edwards, co-founder and vice president, Taylor’s Tale

Total NIH Award Funding (FY16)
$179 million

Research in the Palmetto State

Medical University of South Carolina (MUSC), Charleston, SC
National Institute of Health (NIH)-funded MUSC researchers have discovered that pericytes, cells essential to the normal function of the blood-brain barrier (BBB), create a rapid disruption of the BBB during strokes. This finding could provide a novel target for future therapies to combat stroke-related brain injuries.

Translational Oncology Research, Greenville, SC
Translational Oncology Research is participating in Rexahn Pharmaceuticals-sponsored clinical trials to assess a medication that holds significant promise in the treatment of advanced solid tumors.

Clemson University, MUSC, and Health Sciences South Carolina (HSSC), Clemson, SC
The Agency for Healthcare Research and Quality (AHRQ) is funding research at Clemson University, in collaboration with MUSC and HSSC, to identify effective methods of reducing infections and other potentially life-threatening adverse events that can arise during surgery.
