

“Without
research,
there is no
hope.”

The Honorable Paul G. Rogers

The Paul G. Rogers Plaza

National Institutes of Health

Dedicated
June 12, 2001

During his twenty-four years as a member of the United States House of Representatives, the Honorable Paul G. Rogers authored numerous laws to support and develop the mission of the National Institutes of Health. His lifetime of public service has been distinguished by tireless advocacy for public health and medical research, and is recognized by an act of Congress dated December 21, 2000 designating this plaza in his honor.

Paul G. Rogers' service to the United States includes distinguished service in the Armed Forces, twenty-four years as a member of the U.S. House of Representatives, and leadership of numerous non-profit organizations, foundations and corporations.

• • service
VISION
advocacy

Paul Rogers' Congressional record on health and the environment earned him

For more than five decades, the Honorable Paul Grant Rogers has served his nation as a visionary leader with accomplishments to match.

the sobriquet "Mr. Health." Since passage of the National Cancer Act, which he introduced, the childhood death rate by cancer has dropped by more than 60 percent.

Communities as distinct as Anchorage and Miami are the beneficiaries of his Safe Drinking Water Act. The dramatic rise in opportunities for young adults to become dentists, doctors, nurses, pharmacists and scientists is the result of the Health Manpower Training Act he conceptualized. Low income families and this nation's economy were boosted by the Medicaid Anti-Fraud and Abuse Amendments of 1977 that he co-authored, and his Research on Aging Act was the forerunner of new knowledge that has kept this country on the cusp of better treatments and even possible cures or preventions for osteoporosis, Alzheimer's, Parkinson's and arthritis.

To quantify the number of individuals his work has impacted would span every demographic.

To interview all of the people who have been encouraged to volunteer because of Paul Rogers' persuasive pleas would take a lifetime. His groundbreaking legislation serves as a model for three decades of local, state and federally elected officials. His commitment to achieving innovative, non-partisan, non-confrontational solutions has been adopted by corporations, organizations and legislatures across the country.

Better health and improved quality of life are the hallmark commitments of the Honorable Paul G. Rogers, U.S. Congressman and citizen advocate extraordinaire.
