

Gwenaëlle E. Thomas, Ph.D. is the Scientific Project Manager at the Lieber Institute for Brain Development (LIBD) and an Adjunct Professor of Biology at Morgan State University. As an undergraduate Meyerhoff Scholar, she earned a dual Bachelor of Science degree in Psychology and Biochemistry from the University of Maryland, Baltimore County. She attended Duke University for her graduate school studies where she earned her PhD in the School of Medicine department of Neurobiology and a Certificate in College Teaching. Dr. Thomas specialized in neuropsychopharmacology and investigated cognitive dysfunctions in schizophrenia and related psychiatric illnesses while training with the late Dr. Marc Caron and Dr. Kafui Dzirasa. In 2020, she co-founded a non-profit BlackInNeuro and served as the Director of Communications for three years. Dr. Thomas is also a science communicator and uses digital media platforms to discuss ongoing mental health research, health disparities, and common biomedical mis- and dis-information.
