

Dr. Monica Parise serves as the Deputy Director for Science and Program, Division of Parasitic Diseases and Malaria in CDC's National Center for Emerging and Zoonotic Infectious Diseases. The Division's work focuses on ensuring the prevention, diagnosis and treatment of parasitic diseases in the United States and on reducing the global burden of malaria and priority Neglected Tropical Diseases. She has previously served as Chair of FDA's Antimicrobial Drugs Advisory Committee as well as Chair of CDC's USPHS Honor Awards Board for several years.

From 2014- 2023 she served as Director, Division of Parasitic Diseases and Malaria.

From 2005-2014 she served as Chief, Parasitic Diseases Branch where she supervised CDC activities in the United States and globally related to all non-malaria parasitic diseases: epidemiology; surveillance; prevention and control; reference and developmental diagnostics testing; pathogen discovery; studies of disease pathogenesis; and treatment.

After serving as an EIS Officer from 1993-1995 in the Malaria Branch and then a year in Puerto Rico (1995-1996) working on dengue, she served as a Medical Officer in the Malaria Branch from 1996-2005, where she directed activities related to surveillance, prevention, and treatment of malaria in the United States as well as pregnant women in malaria-endemic areas.

Dr. Parise graduated from the University of Pittsburgh School of Medicine in 1986. She completed training in Internal Medicine at Brigham and Women's Hospital in Boston in and an Infectious Disease fellowship in the Harvard Combined Infectious Disease Program in 1992. As part of her Infectious Disease fellowship and later for Harvard School of Public Health, Dr. Parise lived in northeastern Brazil for 3 years working on clinical and epidemiological studies of cutaneous leishmaniasis.
