

CIVIC ENGAGEMENT MICROGRANT PROGRAM

Research!America provides up to \$4,000 of funds to STEM groups led by master's, Ph.D., postdoc, or professional students to design and execute projects that create dialogue with public officials, local community leaders, and the public around issues of common concern.

— PROJECT EXAMPLES —

- “Ask a scientist” at local farmers’ markets.
- Hands-on science content with middle schoolers.
- Moderated discussions with public officials and community members.

PUBLIC ENGAGEMENT CONTENT AWARDS PROGRAM

The program offers stipends of up to \$5,000 each to fund open access curriculum development in science communication and other public engagement skills. Stipends are open to PhD candidates, post-docs, professional degree candidates, and junior faculty in STEM and STEM-adjacent fields.

— PROJECT EXAMPLES —

- An online course on science communication utilizing social media platforms.
- Self-paced online training videos and instruction materials on forming relationships and communicating with policymakers.
- Hybrid curriculum aimed at equipping STEM students with essential science communication skills.
